

**Thank you for purchasing our Video Store Software!**

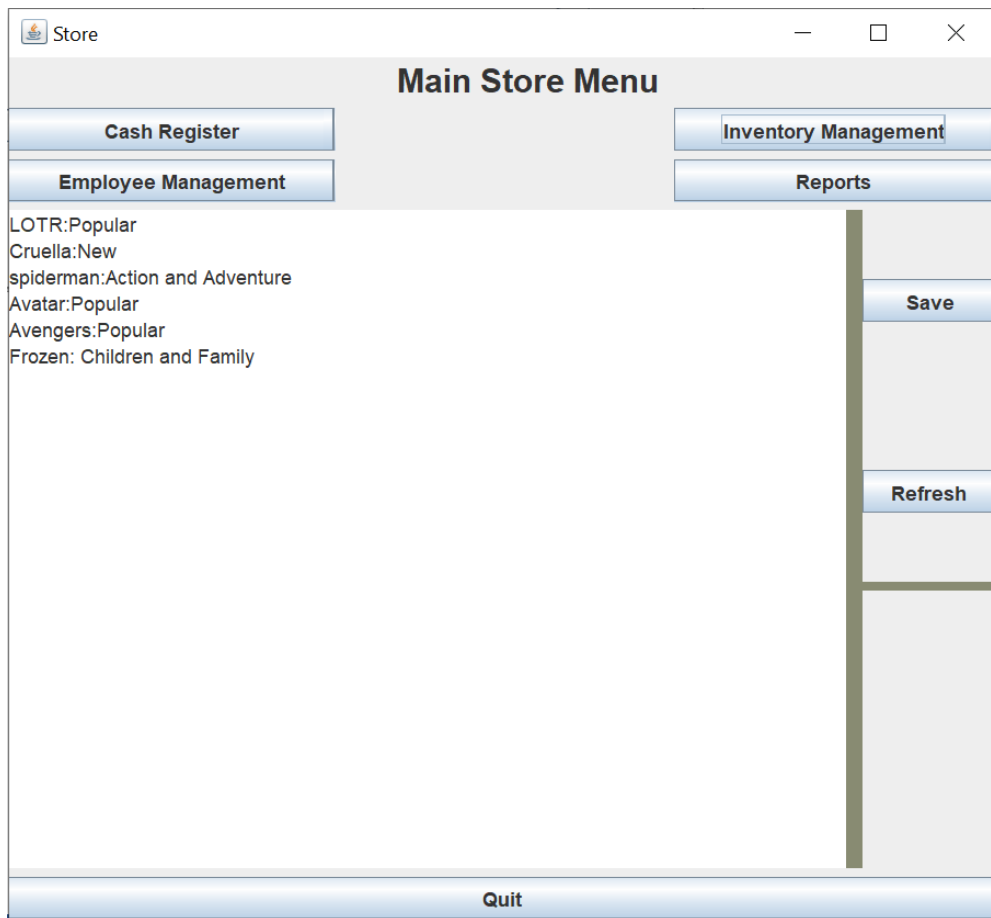

**One of the most important functions of our system is the Cash Register. When you click this button you'll be brought to a new screen.**

**Here, you can add, remove and total the purchase for your customers!**

**The next feature of our software is the inventory management system:**

**When you open this menu you will see an editable report of all inventory that can be saved or refreshed.**

**The employee management menu is similar to the inventory Management and enables you to keep a list of all staff members and their employee IDs.**

**The Report Menu has the option of running employee and Inventory reports.**

**These reports can give information on the number of movies on hand. You can even search that inventory using the search feature!**
